

1    **ABSTRACT OF THE DISCLOSURE**

2            A clock has a luminous decoration member provided on a dial of the clock. The  
3    luminous decoration member is made of a transparent material and formed in an annular  
4    shape having multiple lightings fitted therearound. A layer of fluorescent material is  
5    applied on a rear side of the luminous decoration member. Whereby when the lightings are  
6    providing light on the luminous decoration member, the fluorescent material applied on the  
7    luminous decoration member is lit so as to emit colorful fluorescence to the surroundings  
8    thereof. Therefore, a user can easily observe the dial and clock hands of the clock in the  
9    dark or night.
